A result-driven Mobile Engineer with 5+ years of experience in coding, developing, and optimizing high-performance mobile applications. Extensive expertise in Jetpack Compose, Kotlin Multiplatform (KMP), MVVM, and scalable architectures. Strong background in cross-functional collaboration, CI/CD automation, and Android platform improvements, including deploying and debugging applications.

TECHNICAL PROFICIENCIES

Languages: Java, Kotlin, XML, Swift, Groovy, JavaScript

Tools & Frameworks: Android Jetpack (Compose, Room, WorkManager, Lifecycle), Dagger2, Hilt, Koin, Retrofit, Kotlin Coroutines, Kotlin Flows, Firebase, GraphQL, CameraX, CI/CD (Jenkins, GitHub Actions), Agile/Scrum

Architectures & Practices: MVVM, Clean Architecture, Multi-module, Dependency Injection, CI/CD (GitHub Actions, Jenkins, Bitrise), Performance Optimization, Unit & UI Testing (Espresso, JUnit), Open Source practices.

Version Control: Git, GitHub, GitLab, BitBucket

EXPERIENCE

Senior Mobile Android & iOS Engineer (Full time)

Lagos, Nigeria

Grey Finance

AUG 2022 – Present

Developing Android and iOS solutions using Kotlin Multiplatform to share common logic. Implementing iOS views with SwiftUI and Android UI with Jetpack Compose.

- Developed and maintained Android & iOS applications using Kotlin Multiplatform (KMP), SwiftUI (iOS), and Jetpack Compose (Android)
- Collaborated across teams to integrate much needed features and bug fixes, releasing Android and iOS solutions.
- Worked on increasing the Play Store rating from below 3★ to ~4★
- Involved in all the new features on the mobile side such as invoicing, send, statement, kyc refresh.
- Worked on the deep-linking feature for both iOS and Android client apps.

Android Engineer (Full time)

Lagos, Nigeria

Cavista

OCT 2021 – SEP 2022

Worked on AccessCare and Home Health teams, developing features, maintaining libraries, and writing tests.

- Developed and maintained core features for the health-tech applications, improving clinician workflows.
- Automated UI testing with robot pattern, reducing repetitive work and improving test coverage by about 30%.
- Led debugging initiatives, resolving critical production issues and boosting app stability and reducing customer-reported issues by 35%
- Mentored and onboarded new Android Engineers into the team helping with getting them settled and teaching what was needed.

Android Engineer (Contract)

Lagos, Nigeria

LawPavilion

SEP 2021 – OCT 2022

I worked on developing the JustEase application as a part-time contract developer. Implemented complex UI and wrote complex solutions to deliver the needed application

- Worked on redesigning the UI of the App to make it more appealing and easy for users.
- Designed and optimized real-time location tracking and video recording features for security-focused applications.
- Implemented features using CameraX APIs for enhanced media functionality
- Reduced build time by 25% by improving the apps Gradle setup to make development faster

Android Facilitator (Contract)

Asaba, Nigeria

Tech4Dev

APR 2021 – SEP 2021

I was part of the 2021 ICT Youth Empowerment Training Programme organized by the Delta State Government in collaboration with Valuworks & Techdev, where I got to successfully train and mentor hundreds of android developer enthusiasts. My responsibilities included:

- Structuring a training curriculum for teaching the students Android development with Kotlin and the latest Android tools. This boosted employment rates, with 10% of students securing jobs immediately.
- Mentored over 100 aspiring Android developers, guiding them through real-world mobile projects.
- Partnered with the state government to up-skill youths in the latest android development practices through the use of skill assessments, lectures, and code which improved retention among students.
- Guided students to develop Android applications during the project phase, exposing them to real-life problems and how to build solutions.

Kotlin Engineer (Contract)

London, UK

FrontEndLabs Ltd

AUG 2020 – SEPT 2021

I worked on a product from scratch and developed the Android application with clean, functional, and adaptable code, delivering complex user interfaces and debugging issues.

- Championed user engagement by incorporating push notifications using Firebase in-app messaging.
- Developed apps using Kotlin Multiplatform, enabling shared code across Android and iOS., using tools like Kotlin and Ktor which led to a 30% reduction of overall code.
- Designed App UI with Jetpack compose which sped up development time by about 20%
- Utilized GraphQL in the shared multiplatform app module which removed the problem of under-fetching or over-fetching in the app codebase.
- Wrote both robust unit and Integration tests using Androidx test and also the CI & CD pipeline for development. This helped the team stay abreast of any issues.

Android Engineer (Contract)

Lagos, Nigeria

Insecta Studios

AUG 2020 – JAN 2021

I was contracted to complete 2 incomplete app solutions for the fast-paced company on joining and completed 2 solutions in such a short time. My responsibilities included:

- Determining client needs, conceptualizing ideas, planned development, and performed feasibility assessments
- Developing app solutions that worked on low-level consumer tablets while using custom views and animations.
- Debugged and swiftly resolved application issues.
- Improved performance by over 50% by determining and fixing bottlenecks with old app solutions.
- Orchestrated an increase in user retention by redesigning using beautiful UI components, using XML, ConstraintLayout, and CustomViews which gave the app a professional look

Android Engineer (Intern)

Lagos, Nigeria

Hotels.ng

SEP 2019 – NOV 2019

Hotels.ng is a hotel service tech company that provides a platform for young Engineers to showcase their skills by solving specific problems in a team during their internships.

- Involved in the development of two app solutions using Java, XML, and Retrofit. The KidStories app helps read bedtime stories to children and CarPark finds parking spots in the city.
- Responsible for releases and version control branch management due to my extensive knowledge of git

EDUCATION & CERTIFICATIONS

Federal University of Technology,

Bachelor of Technology (B.Tech), Physics (Electronics Option)

Imo State, Nigeria

- Specialized in Embedded Systems, Circuit Design, and Software Development.
- Gained strong foundations in programming, data structures, and algorithms.
- Developed software projects using C++ and Python

Udacity

Android Developer Nanodegree

APR 2020 – JUN 2020
